Double Patenting

Applicant is advised that should claims 1 and 2 be found allowable, claims 3 and 4 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Grünewald.

Grünewald teaches a crystal analyzing apparatus comprising the following as recited in the claims:

Claims 1 and 3: A crystal analyzing apparatus comprising:

- An ion beam emitting portion (1, 2)
- An electron beam emitting portion (3)
- A detecting portion for detection of a backscattered diffraction pattern (7, 8, 9)
- An analyzing portion for defining an arbitrary three dimensional region for performing analysis (19).

Art Unit: 2881

Claims 2 and 4: A crystal analyzing apparatus:

- where the apparatus analyzes and optimizes the position and orientation of the crystal relative to the ion and electron sources while analyzing the orientation of the sample (Col. 3 Line 56 through Col. 4 Line 43).
